

YOUR HELP IS STILL NEEDED!

A MAJOR MILESTONE HAS BEEN ACCOMPLISHED - ROCKHILL TROLLEY MUSEUM HAS BECOME THE FIRST MUSEUM ON THE EAST COAST TO OPERATE A MODERN LIGHT RAIL VEHICLE – BUT ADDITIONAL FINANCIAL SUPPORT IS NEEDED!

At 7:20PM on Thursday, June 26, 2014, Rockhill Trolley Museum became the first museum on the East Coast of the United States to operate a modern light rail vehicle. Newly acquired San Diego Trolley #1019 operated under its own power one week after it was delivered the museum and reassembled by a team of volunteers and professional mechanics.

Even with the tremendous assistance received to date, the museum very much needs additional financial contributions to repay funds borrowed to complete the costs of transportation from San Diego, as well as to support the costs of operating and maintaining a vehicle unlike any other in the museum collection.

A visitor experience like no other - the museum's oldest (1904) and newest (1982) operating cars present a unique educational experience. With your contributions, we can make this feasible on a recurring basis.

Why financially support a car like this? Because for today's youth, who will be our future visitors, volunteers, and members, this is the type of trolley they are familiar with, like previous generations were with older cars. The story of the trolley car did not end in the 1940s!

Donations of any amount will help us complete these goals. Your help is essential and most appreciated!

Yes, I want to help fund this monumental step forward for Rockhill Trolley Museum

Name _____ Amount of donation _____

Address _____

City _____ State _____ Zip _____

Email address _____

Please mail all contributions to:
Railways To Yesterday Inc. P.O. Box 1601, Allentown, PA 18105
